

Redu Space Services (RSS) is looking for talents for the Education Office at the **European Space Agency Security and Education Centre (ESEC), in Redu in the Ardennes region of Belgium.**

The RSS education team provides a broad range of services in support of the activities of the ESA Education Office at the ESA Education Training Centre in ESEC-Galaxia such as the support to the STEM Learning and Inspiration programme for primary and secondary school teachers, including the operation of the e-Technology lab, a didactic laboratory which offers direct hands-on experience to teachers by using space robotics and space science as learning and teaching contexts.

- Learn with Space – is strictly educational, with activities designed with specific learning objectives in mind, both for youngsters and their educators.
- Let Space Inspire You – is strictly inspirational; it is aimed at using the ‘wow’ factor generated by space to spark children and teenagers’ curiosity and imagination, and to stimulate their interests towards STEM and space studies and careers.

All these activities are solidly rooted and implemented at national level through the ESA ESERO framework project, a network of dedicated national offices and consortia of partners established by ESA in its Member and Associate States.

*Detailed information on the activities of the ESA Education Office can be found at:
<https://www.esa.int/education>.*

Ideal candidates shall meet the following criteria:

- Be a national of a Member State of the European Union or European Space Agency.
- Fluent in spoken and written English; Knowledge of French is an asset.
- Have a master’s degree in a Space related or Engineering or a scientific or business domain.
- Strong interest in education activities, and in the field of science and technology in general.
- Experience in space project management, teaching or in educational projects is a strong asset.
- Proven ability to effectively coordinate work contributions from several different parties, and ability to establish and maintain effective working relationships with all stakeholders (ESA, the involved international partners, industry, academia, and students).
- Candidates will be expected to have good organisational and reporting skills, as well as a strong proactive, self-starter and autonomous attitude.
- Strong capacity to learn and adapt as well as an excellent aptitude for resolving problems autonomously and diplomatically, as the successful applicant will be in direct contact with many different stakeholders, from a wide range of ESA staff at different levels, to representatives of academia, experts, industry, and ESA’s international partners.
- The working environment is very international, multidisciplinary and has a strong focus on teamwork, therefore candidates are expected to be able to establish and maintain good working relationships with a variety of people from different nationalities and backgrounds.

Interested in joining us? Please submit your application (CV and cover letter) by email to marieve.bellot@reduspaceservices.com and jose.luis.fernandez@reduspaceservices.com
